Guidelines for Project/Dissertation

Section I

Introduction:

There is a requirement to prepare and submit a Project/Dissertation in Four Year Undergraduate programme and Two-Year PG Programme in English offered by Krishna Kanta Handiqui State Open University. The Project/Dissertation has been incorporated in the Eighth Semester of the Four-Year Undergraduate Program and in the Fourth Semester of the Two Year Postgraduate Programme in English. The primary objective of Project/Dissertation is to familiarize the learners with the basic concepts of research and research methodology at the postgraduate level that will enable them to head towards higher dimensions of research such as PhD.

A Project/Dissertation is a particular kind of academic task. You will usually be asked to generate a topic for yourself; to plan and execute a project investigating that topic; and to write up what you did and what your findings had been. You are expected to hone your theoretical and quantitative abilities through their application in the light of the information gathered while considering different aspects of literature, language and culture. This Project/Dissertation work consists of 8 credits, requiring about 240 hours of study and work.

Dear learners, please note that you need to take this task utmost seriously and with all your sincerity and dedication because of three basic reasons. First, this course provides you ample scope to apply your theoretical understanding of relevant issues of literature, language and culture. Secondly, this course carries the highest credits among all your courses in the programme. Thus, this course can help you achieve a better, higher grade in the programme. Finally, this project/dissertation activity provides you a scope to acquire research skills. This will ultimately help you undertake a career/study in research in near future.

In undertaking the Project/Dissertation work, you can take up a theoretical issue, or any socially relevant issues that you may have come up during your study. You should formulate a detailed research proposal along with your theoretical understanding of the issue. This is also done in the Second Semester of the Two Year Postgraduate Programme in English. You need to write your Project/Dissertation Report either in English.

The main steps to write a dissertation are:

- a) Choose your research topic carefully.
- b) Check what is exactly required.
- c) Have a clear goal and structure.
- d) Write as you go.
- e) Continue to question.
- f) Don't underestimate the editing stage.
- g) Enjoy the achievement.

Most importantly, you should note that the Project/Dissertation Work undertaken should be authentic and should contribute towards the development and growth of the subject. It is mandatory that you submit the report in originality and you must not submit it earlier for any other purpose. Moreover, the University will use high-end plagiarism detection software to check all the project and dissertation reports. Thus, you should also note that if it is found that the Project/Dissertation Work undertaken does not appear to be authentic or does not contribute towards the growth of the subject or it has been merely copied from some sources, the University has the right to reject the Project/Dissertation Work without offering any explanation. In that case, you will be awarded zero. Group projects are not allowed. If it is found that the subjects/chapters/contents of the projects of two learners are matching, then both the projects will be rejected. Zero mark will be awarded to both.

Presentation Style

You need to follow the Presentation Style in the layout of your Project/Dissertation Report as mentioned in Section II of this Guidelines. Additionally, in Section III, we have provided certain Guidelines/Tips to help you do your Project/Dissertation more effectively.

Citation and Referencing Style in Project/Dissertation

Writing of Project/Dissertation Report is one of the research tasks. So, you need to follow a particular style of citation and referencing. The University follows the American Psychological Association's APA 7 Citation Style. A link to download a brief APA Citation Guide is: <https://apastyle.apa.org/style-grammar-guidelines/references/examples>

Role of your Project/Dissertation Guide

Your project/dissertation guide should be well-versed in the subject area, which will help you in designing the objectives, procedure for data collection, and

analysis. You must discuss your project/dissertation design with your guide before the start of your work and also again, if necessary, at the writing stage and finally at the stage of editing the report. You should show your guide the draft project report before it is finalized for submission.

Eligibility of a Project/Dissertation Guide

- Faculty (from the University/Degree College)/Course Coordinator/Academic Consultant/ Counsellor having relevant teaching experience.
- Professionals holding Master's degree in the respective field or allied disciplines having a minimum of 5 years of experience in the relevant area.
- If you are taking the help of a Teacher/Professional apart from the faculties engaged during the counselling sessions at your study centre, then the Teacher/Professionals biodata is to be approved by the respective Course Coordinators. The bio-data should contain the teaching/work experience, area of specialization, research publications and experience in guiding the project work.

Key Points:

- Always preserve a copy of the Report with you with all due signatures in originals. This may be required for your future academic/research/job purpose. Secondly, the University may also ask a copy of that report as and when required.
- You may be asked to present your Report either at the University Headquarters/or at any assigned place face to face or through online mode.
- Project/Dissertation Report must be typed in Computer. Report may be printed on both sides in standard A-4 size papers with 1.5-inch margins on left and 1.2-inch margins on right sides and 1.2-inch margins on top and bottom. Page numbers must be maintained throughout. The Title/Acknowledgement/ Content pages should be numbered in Roman letters (i, ii, iii etc...) while the main body part must be numbered in standard (1,2,3,...) format. Annexures should be included at the End and should also be numbered in Roman letters (i, ii, iii etc...).
- The Project/Dissertation Report should be printed on both sides of paper. For English Times New Roman font, size 12 point with spacing of minimum 1.5 has to be used.

Section II

Project/Dissertation Performa

Cover Page:

The cover page on the bound copy of the report should indicate.

- The title of the report. It would be short, if necessary, it should be followed by an explanatory sub-title.
- Your name and enrolment number/ Exam roll no /year of examination.
- Name and designation of the faculty member/ Coordinator/ Academic Consultant who has guided you.
- Name and designation of the person of the organization who has guided you.

Colour of the Hard Cover of the Project Report must be NAVY BLUE.

Certificate of the Guide/ Supervisor (Format)

<u>Certificate of the Guide/ Supervisor</u>	
Mentor / Guide Name:	
Designation:	
<p>This is to certify that the project report entitled “.....” has been prepared by Ms/Mrs.....bearing enrolment Nounder my supervision and guidance, for the partial fulfilment of Four Year Undergraduate Programme/Two Year Postgraduate Programme in English of Krishna Kanta Handiqui State Open University. His/her field work is satisfactory.</p>	
Date:	Signature:

Certificate of the Study Centre Coordinator/ Academic consultant of Study Centre

<u>Certificate of Study Centre Coordinator/ Academic consultant</u>	
Coordinator/ Name of Academic Consultant:	
Designation:	
<p>This is to certify that the project report entitled “.....” has been prepared by Ms./Mr under the guidance of Dr./ Sri/Mr./Ms.....for the Partial fulfilment of Four Year Undergraduate Programme/Two Year Postgraduate Programme in English of Krishna Kanta Handiqui State Open University. His/her field work is satisfactory.</p>	
Date:	Signature:

Acknowledgement:

The learner should provide an acknowledgement of the help received from the Supervisor, other teachers, Libraries and any other organizations/ sources/ persons. One may also acknowledge assistance from family members, friends and

others. The learner has to put his / her signature and the Enrolment No. at the end of the acknowledgement.

Self-Declaration by the Learner

The learner has to make the following declaration:

<u>Self-Declaration by The Learner</u>	
I do hereby declare that this project work entitled “.....” submitted by me for the partial fulfilment of the requirement for the award of Four-Year Undergraduate Programme/Two Year Postgraduate Programme in English of Krishna Kanta Handiqui State Open University is a product of my own research work. The report embodies the finding based on my study and observations and has not been submitted earlier for the award of any degree or diploma to any Institute or University.	
Name:	Enrolment Number:
Signature of the Learner:	Date:

Table of Contents

Also called INDEX, the Table of Contents should provide the title of all chapters (with page numbers) major subdivisions and appendices. The table should also indicate the commencing page numbers of the preface, the bibliography, appendices & annexures.

Main Report

Your main report should follow the chapter scheme you had indicated in your synopsis. Generally, the sequential presentation should be as follows:

Chapter I: Introduction of the Problem: This chapter should provide a background of the problem and what is proposed to be investigated. The significance of the problem, the objective and the scope of the study and the contribution and impact your study will make should be elaborated. A brief description of the organization where you have conducted the project should be provided. —

Chapter-II: Theoretical Perspective, Methodology, Scope, Limitations: This chapter should give an overview of the theoretical concepts related to the problem under study. You should refer to the current status of research in the area and major findings thereof. These should bring out the necessity for a study of the

kind you have undertaken and the approach you intend to follow. This chapter should describe in detail the steps followed in completing the study. If you have done a field study-based work then the sample survey, the basis of sampling its size etc. should be discussed. The sources of primary and secondary data must be stated and the way you have processed the data should be elaborated. You can also describe the scope and limitations of your study.

Chapter III, IV, V, VI Discussion/Body of the Report: Presentation of the relevant data and analysis and discussion thereof form the main body of the report. After you define your research problem clearly and definitely, before you start the report, decide on the main theme of your report; which of the findings are significant, which are peripheral? Develop your argument logically to build your theme, presenting data wherever necessary. Decide the distribution and the number of chapters required; keep appropriate balance in the size of the chapter, and avoid uneven coverage. Only include those parts of a table in the chapter which are relevant to the arguments, the details can be in the appendix. Spend more time on the central issues, giving them importance, clarity and emphasis. All issues if treated in the same manner will dilute a report.

Appendices and Annexure: Appendices are listed alphabetically e.g., Appendix A, Appendix B etc. and contain the table and data collection for the study. They are not included in the main chapters but referred to in the discussion and interpretations. Appendices are placed after the last chapter on summary conclusions.

Annexures are numbered numerically e.g., Annexure II etc. and contain such supporting information which are not collected as primary and secondary data, yet is relevant in discussion and for easy reference.

References: References can be mentioned either at the bottom of the appropriate page where these are referred or at the end of each chapter. If this has not been done, a third alternative is to list them at the end of the report immediately after the appendices / Annexures.

Bibliography: A bibliography is a list of the published sources consulted during the course of the project work and normally includes all works listed in the text and text notes. The bibliography should be arranged in APA 7th Citation Style.

Section II

A Guide to Organising the Contents of Project Report /Dissertation

The Title of the Study

A single sentence describing the inquiry should be in the title. The title is frequently used to refer to the independent and dependent variables. Avoid titles that imitate newspaper headlines; a formal report is not a journalistic assignment. Bear in mind that your reader will first notice the title of the report and will want to know if the report is relevant to his or her research interests. Your project/dissertation title should be a short yet accurate description of the report's content. Avoid using terms such as "a research into..." or "an experiment to discover" = in the opening of your title. Such sentences are redundant and contribute nothing to the text; they also reflect sloppy thinking. The phrase "title" is not acceptable as the initial word in a title. The reader will identify it as the title due to its placement.

The Abstract of the Study

The abstract describes your entire work in a single paragraph. A short overview of the goal and approach should be provided, as well as sections on the findings and discussion. Exclude detailed information such as statistics and statistical test-names from this section. Aim for a length of maximum 150 words for your abstract. The abstract is the second thing a reader sees after the title, and it may be the only thing they see. As such, it should give a comprehensive yet brief overview of the whole report, allowing readers to decide whether to continue reading or not. As a general rule, write four short lines describing (1) why you did it, (2) what you did, (3) what you discovered, and (4) what you concluded. Write the abstract once you have completed the body of the report. You may struggle to write a concise abstract in a single session. Perhaps it is more convenient to start with a lengthier version and then shorten it.

Introduction to the Study

To begin, you should defend the study you're addressing. This implies that after reading the introduction, the reader should be able to deduce the subject of your Report. Simultaneously, your introduction should explain to someone who is not an expert why you did this study. As a consequence, the introduction will begin with a general framework and go to the study's specific reasoning and objectives. Typically, this section will include an overview of prior work in the subject, as well as an explanation of the theoretical or practical motives for doing the study. The following is an example of an effective content sequence for an introduction:

- Describe and identify the subject you wish to research, and, if necessary, justify its fascination and/or significance.
- Describe previous works (and maybe your own) that relate to the subject at hand.

Justify your previous work's inadequacy. It might have methodological problems, or there could be need for extension of previous work, or this could be the first time it has been reproduced, or you could be comparing the sufficiency of various theories. (If the previous work is complete, error-free, and has been repeated several times, or if the best hypothesis is known, further research is unnecessary.) Justifications for why previous work was inadequate should logically lead to the study you did. You do not need to go into detail here, but it should be obvious how the most recent work resolves open theoretical issues, corrects past research's mistakes, and/or enhances our present understanding.

What are your expectations for the result of your study, and why? Complete this section by describing your study hypothesis/research questions (what you expect will happen based on your theoretical framework and/or the constraints of previous studies). If you are performing more exploratory research and are unclear about the conclusion, briefly describe the study's aims and desired outcomes. This final paragraph of the introduction is critical to the study's and report's comprehension. If this part is well-defined, discussing and evaluating the outcomes will be a lot easier.

Ascertain the relevance of your theories to the essay's main body. Your theories do not have to be enumerated or bulleted.

Methodology of Research

Rather than being a standalone part, the method section should ideally be divided into the following five or so subsections. In the approach section, you describe the steps you used to acquire your data. This portion of your Project/Dissertation Work should include sufficient detail to enable the reader to reproduce the experiment. If you're not very much sure about the research methodology, read over a journal paper on your subject to try to get insights into their research approaches. Mention your use of research tools in this section. It is desirable that you present a Review of Research Methods from earlier studies here.

Chapterisation

Based on your chapterisation plan, organise the main body of the Project/Dissertation in a systematic way. Try to organise your work in a way so that there is a continuity of flow throughout the discussion.

Findings and Discussions

Begin by outlining the actions you took to process the data you found in your study. Never copy and paste other's arguments into your report. Always assess

what information is pertinent and significant and then communicate it without repetition in the most efficient manner possible. In your results section, use the same descriptive labels that you did in your analysis section. This will be beneficial for your readers.

Conclusion

To end the discussion, it is desirable that you draw certain important conclusions of the study and based on those you can also offer certain specific points of your findings. Here, you can also highlight certain limitations you faced during your study or point out certain future directions of research on the area.
